### SYDNEY TECHNICAL HIGH SCHOOL

# TRIAL HIGHER SCHOOL CERTIFICATE

# 2008

# **MATHEMATICS**

#### Time Allowed: 3 hours plus 5 minutes reading time

#### Instructions:

- Write your name and class at the top of this page, and at the top of each answer sheet
- At the end of the examination this examination paper must be attached to the front of your answers
- All questions are of equal value and may be attempted
- All necessary working must be shown. Marks may not be awarded for careless or badly arranged work.
- Marks indicated are a guide only and may be varied if necessary.

#### (for Markers Use Only)

Q1	Q2	Q3	Q4	Q5	Q6	Q7	Q8	Q9	Q10	Total

### Question 1 (12 marks)

a) Find  $e^{-0.6}$  correct to 3 decimal places.

b) Expand and simplify  $(\sqrt{2}-3)^2$ 

c) Given  $\frac{1}{P} = \frac{1}{Q} + \frac{1}{R}$  make Q the subject of the formula.

d) (i) Find  $\int_{1}^{2} \frac{dx}{x}$ 

(ii) Evaluate  $\int_{\frac{\pi}{3}}^{\frac{\pi}{2}} \cos\left(\frac{x}{2}\right) dx$ . Leave your answer as an exact value.

e) Solve the inequality  $|2x - 3| \le 7$ 

f) Solve the following equations simultaneously

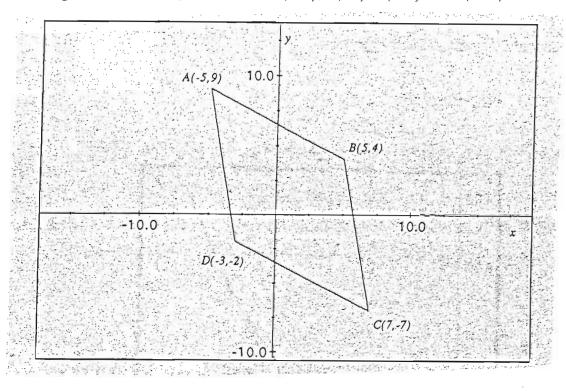

$$2x + y = 4$$

5x + 2y = 9

### Question 2 (Use a separate sheet of paper) (12 marks)

a) A rhombus is a parallelogram with four sides of equal length.

The figure shown below, with vertices A(-5,9), B(5,4), C(7,-7) and D(-3,-2) is a rhombus.

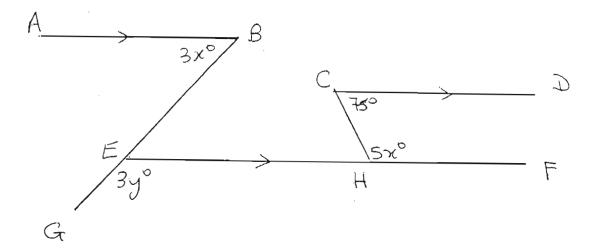

- (i) Find the side length of ABCD. Give your answer in simplified surd form.
- (ii) Find the gradient of the longer diagonal.

1

- (iii) Show that the diagonals of ABCD are perpendicular.
- (iv) Find the coordinates of the midpoint of each diagonal.
- (v) What does this result to part (d) say about the diagonals of this rhombus?
- (vi) Find the equation of the line passing through AC.

Find the value of x and y. Give reasons for each answer.

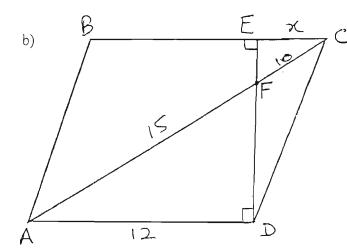

### Question 3 (12 marks) (Use a separate sheet of paper)

- a) Differentiate
  - (i)  $x^2 e^x$
  - (ii)  $\ln\left(\frac{x-5}{x+3}\right)$
- b) (i) Find  $\int \frac{dx}{3x-1}$ 
  - (ii) Evaluate  $\int_0^1 e^{4x} dx$ , leaving your answer in exact form 2
- c) For what values of m does the equation  $4x^2 + (1+m)x + 1 = 0$  have equal roots.
- d) For acute angles A and B it is given that  $sinA = \frac{12}{13}$  and  $cosB = \frac{15}{17}$ Find the exact value of sec A + tan B.

## Question 4 (12 marks) (Use a separate sheet of paper)

a) The sum of the first 4 terms of a geometric progression is 30, and the limiting sum is 32. If the common ratio is negative find the first three terms.

ABCD is a parallelogram.

- (i) Prove that  $\triangle EFC$  and  $\triangle DFA$  are similar.
- (ii) Find the value of x.

Not to Scale

c) Solve 
$$\sin\left(x + \frac{\pi}{3}\right) = 0$$
 for  $0 \le x \le \pi$ 

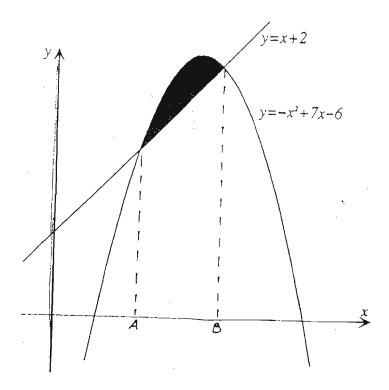

- d)  $\propto$  and  $\beta$  are the roots of  $2x^2 5x + 5 = 0$ . Write down the value of
  - (i)  $\propto +\beta$
  - (ii)  $\propto \beta$

(iii) 
$$\frac{1}{\alpha} + \frac{1}{\beta}$$

#### Question 5 (12 marks) (Use a separate sheet of paper)

- a) A function is defined by  $f(x) = 3x^2 2x^3$ 
  - (i) Find the coordinates of any turning points and determine their nature 3
  - (ii) Sketch the curve, indicating all intercepts and turning points. 2
  - (iii) State the domain over which both f(x) > 0 and f'(x) > 0
  - (iv) On the same set of axes sketch the line  $f(x) = \frac{1}{2}$
  - (v) Hence find the <u>number</u> of solutions to the equation  $6x^2 4x^3 = 1$

The diagram shows the graphs of the functions  $y = -x^2 + 7x - 6$  and y = x + 2.

- (i) Show that the value of A and B is 2 and 4 respectively
- (ii) Calculate the area of the shaded region.

# Question 6 (12 marks) (Use a separate sheet of paper)

a) Evaluate 
$$\sum_{r=1}^{4} 3^{r-r}$$

b) For the arithmetic progression 32, 25, 18, .....

(ii) 
$$S_{15}$$

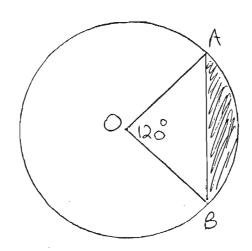

The area under the curve  $y = 4^x$  between x = 0 and x = 2 is rotated about the x - axis. Copy and complete the table.

х	0	0.5	1	1.5	2
4 <sup>2x</sup>					

Use your results with Simpson's rule to find an approximate value for the volume of revolution. Use 5 function values and answer correct to 1 decimal place.

3

d)

The circle has a radius of 2cm

- (i) Find arc length AB
- (ii) Find the shaded area

. . .

(correct to 1 decimal place)

Question 7 (12 marks) (Use a separate sheet of paper)

a)  $f'(x) = 3x^2 - 4$ .

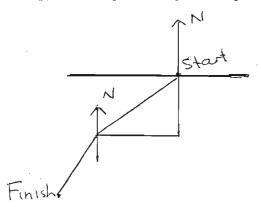

Find y = f(x) if the function passes through (3, 8).

2

b) A boat travels 5km on a bearing of 207° T, then travels 8km on a bearing of 200°T.

Find the straight line distance between the start and finish to 3 significant figures.

Copy and complete the given diagram to assist your working.

\$30 000 is borrowed to buy a car. Interest is charged at 12% pa, compounding monthly. c) The loan is repaid in equal monthly repayments over 4 years. Let  $A_n$  be the amount owing after n months. (i) If M is the monthly payment write an expression for the amount owing  $\propto$  ) 1 month after  $\beta$ ) 3 months (ii)Find M Find the total amount paid over the 4 years. (iii) 6 (12 marks) (Use a separate sheet of paper) Question 8 Evaluate lim 2 a) Evaluate  $log_5100 - log_54$ 2 b) A particle moves in such a way that its distance, x metres, from the origin c) after t seconds is given by  $x = 2 + 3t - t^3$  for t > 0Find an equation for its velocity after t seconds. 1 (i) At what time does the particle stop? (ii)1 Where is the particle initially? (iii) 1 (iv)Find the velocity after 2 seconds. 1 (v)How far has the particle travelled in the first 2 seconds. 2 Find the volume of the solid formed when the curve  $y = \sqrt{x}$  is rotated about d) the x axis between x = 1 and x = 5. (leave the answer in terms of  $\pi$ ). 2

Question 9 (12 marks) (Use a separate sheet of paper)

a) If 
$$F(x) = \begin{bmatrix} x^2 - 2 & x \le -1 \\ 2^x & -1 < x < 2 \\ log_{10}x & x \ge 2 \end{bmatrix}$$

evaluate f(-1) + f(1) + f(10).

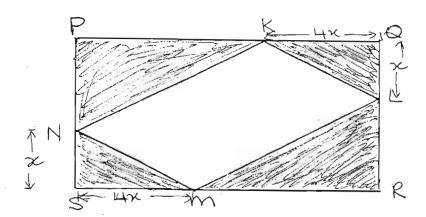

b) Draw a neat sketch of y = 3sin2x within the domain  $0 \le x \le 2\pi$ .

State the

- (i) period
- (ii) amplitude.

In the diagram, PQRS is a rectangle with PQ=40cm, SP=10cm.

The shaded portions are cut away, leaving the parallelogram KLMN. QL=SN=x cm and QK=SM=4x cm.

(i) Show that the area of the parallelogram KLMN is given by

$$A = 80x - 8x^2$$
.

(ii) Find the allowable values of x

(iii) Find the value of x for which A is a maximum

3

2

4

2

1

#### Question 10 (12 marks) (Use a separate sheet of paper)

- a) For all values of x in the domain of  $0 \le x \le 6$ , a function f(x) satisfies f'(x) > 0 and f''(x) > 0.
  - Sketch a possible graph of y = f(x) in this domain.
- b) (i) Find the points of intersection of the curve  $y = 4 \sqrt{2x}$  with the x and y axes. 2
  - (ii) The area enclosed by the curve  $y = 4 \sqrt{2x}$ , the x axis and the y axis is rotated about the y axis. Find the volume of the solid of revolution so formed (leave your answer in terms of  $\pi$ )

4

The line x = m, cuts the curves  $y = log_e x$  and  $y = log_e 5x$  at R and S respectively.

Show that the tangents to the curves at R and S are parallel. Also show that the distance RS remains constant for all values of M (ie the distance is independent of m).
